## Fitness Homework - Math connection

Name $\qquad$ Date $\qquad$ Class $\qquad$
In Physical Education class, we learned how to calculate a target heart rate range. For homework, your assignment is to use YOUR AGE, and YOUR RESTING HEART RATE to calculate a PERSONAL target heart rate range. Then answer the questions and have your parent/guardian sign your work. Remember to keep your decimal points lined up.

## Calculating YOUR Target Heart Rate Range

Purpose: To identify a PERSONAL target heart rate zone; which is a safe and comfortable level at which to perform physical activities.
Procedure: Study the example provided before completing this activity

|  | EXAMPLE | FOR YOU |  |
| :---: | :---: | :---: | :---: |
|  |  | LOWER LIMIT | UPPER LIMIT |
| Start with 220 <br> Subtract your age | $\begin{array}{r} 220 \\ -20 \\ \hline \end{array}$ | $\qquad$ | $220$ |
| Equals Maximum Heart Rate (MHR) Maximum times heart should beat/min. | 200 | $=$ | $=$ |
| Subtract YOUR <br> Resting Heart Rate | -70 | - | - |
| Multiply by: <br> 60\% - Lower Limit 80\% - Upper Limit | $\begin{array}{r} 130 \\ \times .60 \end{array}$ | $\begin{aligned} & = \\ & \\ & \times .60 \end{aligned}$ | $\qquad$ |
| Add Resting Heart Rate | $\begin{array}{r} 78.00 \\ +70.00 \\ \hline \end{array}$ | $=$ | $=$ |
| Equals Target Heart Rate (THR) | 158 Beats per minute | Beats per minute | Beats per minute |
|  |  | YOUR THR |  |

1. What does it mean if your heart rate is not within your target heart rate range when you are done exercising or participating in a physical activity?
2. What should you do if you take your pulse (heart rate) during activity and it is above your target heart rate range? WHY?
3. What should you do if you take your pulse (heart rate) during activity and it is below your target heart rate range? WHY?
